f	forecast
p	preliminary
r	revised
NES	Not Elsewhere Specified
C	Census of Canada
CMA	Census Metropolitan Area
M	thousand(s)
MM	million(s)
MW.h	megawatt hours
GW.h	gigawatt hours

Note: Components may not add to total due to rounding.

PREFACE

The *Alberta Statistical Review Quarterly* presents a comprehensive summary of socio-economic information pertaining to the province of Alberta. The statistical tables and graphs provide both historical and current data at provincial and sub-provincial levels. Many tables also include comparisons between Canada and the provinces.

The Review is arranged into eleven major subject areas supplemented by a glossary detailing definitions of terms and concepts. A brief narrative analysis is also included which highlights interesting trends occurring in the Alberta economy.

In this edition, a new section has been introduced presenting information from the *Federal Census of Canada* and will be primarily devoted to newly released data from the 1986 Census. To provide users a summary of data variables available to date, a profile of the province of Alberta (based on a 100% sample) from 1971 to 1986 is featured. Data variables include age, sex, marital status, mother tongue, families, dwellings and households. A glossary of census terms and special notes is also available. As the release of 1986 Census data progresses, future table additions will include more detailed demographic and socio-economic information both at the provincial level and for selected sub-provincial geographical areas such as census divisions and municipalities.

The statistics presented in the Review are compiled from a variety of sources including Statistics Canada, federal and provincial government departments and the Alberta Bureau of Statistics. Selected data are also available on *ASIST* (*Alberta Statistical Information System*), a computerized public data base maintained by the Alberta Bureau of Statistics. Access information is footnoted on the appropriate tables.

*SUMMARY AND HIGHLIGHTS
OF MAJOR ECONOMIC INDICATORS*

HIGHLIGHTS

- For the fifth consecutive month, Alberta's unemployment rate (seasonally adjusted) remained below 10.0%, dropping to 9.7% in September, 1987. This was the fourth lowest in Canada; Ontario's rate has been the lowest since March, 1987. Compared to September, 1986, employment growth in Alberta was the greatest in the service industry where 23,000 jobs were created. Construction jobs rose by 12,000 and public administration workers increased by 3,000. Among industries which lost jobs were transportation and utilities (10,000) and primary industries including oil and gas (3,000).
- Following an increase of 8.6% in 1985, Alberta's personal income grew 5.2% between 1985 and 1986 to total \$42.2 billion. This was the second lowest rate of increase among the provinces. B.C. was lowest at 4.4%, while Saskatchewan led at 10.4%. Ontario registered the highest per capita income in 1986 at \$18,740; Alberta was second at \$17,672, higher than Canada's figure of \$16,901.
- During the first eight months of 1987, consumer spending increased in all provinces compared to the same period a year ago. The largest gains were posted in Eastern and Central Canada (over 8.0%) while sales in Manitoba, Saskatchewan and Alberta grew only 4.5%, 4.2% and 2.5%, respectively. Alberta businesses which reported the greatest increases included household appliance stores (37.0%), used car dealerships (26.5%) and sporting goods/accessories stores (18.5%). Sales from motor vehicle dealerships (largest retail sector) grew 4.9%, while department stores sales dropped 7.7%. Between March, 1987 and July, 1987 the highest provincial per capita sales were recorded in Ontario; Alberta ranked second. However, in August, Alberta had the highest per capita sales at \$530. Ontario followed at \$518.
- Since May, 1987 Alberta urban dwelling starts have reached levels not attained since the beginning of 1983. August starts at 957 were up 95.7% over August 1986. On a year-to-date basis, starts (5,410) were up 27.8% over January to August, 1986. This was the fourth highest increase among the provinces following Ontario (48.4%), B.C. (41.6%) and Quebec (39.6%).
- Alberta drilling activity has steadily increased since May, 1987 and in October, active rigs totalled 283 (out of 472 available rigs). This compares to 96 active rigs in October, 1986.
- Since May-87, year-over-year increases in the Consumer Price Index in both Edmonton and Calgary have been over 4.0%. However, in September, Calgary's rate dropped to 3.9%, while Edmonton's rate moved up to 5.0%, the highest rate since August, 1983. In comparison, Canada's rate has increased from 3.9% in January, 1987 to 4.5% in September.

NOTE: THE ESTIMATED VALUE OF MANUFACTURING SHIPMENTS DATA ARE NOW BASED ON THE 1980 STANDARD INDUSTRIAL CLASSIFICATION (SIC).

REPLACING THE 1970 SIC. AS A RESULT, DATA WERE REVISED BACK TO JAN-81 AND ESTIMATES ON A 1980 SIC BASIS ARE AT SLIGHTLY DIFFERENT LEVELS. DATA WILL NOT BE DIRECTLY COMPARABLE WHERE CHANGES HAVE OCCURRED BETWEEN THE 1970 AND 1980 SIC

(1) TOTALS INCLUDE ESTIMATES FOR SEVERAL INDUSTRY GROUPS WHICH CANNOT BE SHOWN SEPARATELY DUE TO CONFIDENTIALITY PROVISIONS OF THE STATISTICS ACT.

OTHER	(7) 238,695

SOURCE: STATISTICS CANADA: 1971, 1976, 1981 AND 1986 CENSUSES OF CANADA.

(1) EXCLUDES 1986 CENSUS DATA FOR ONE OR MORE INCOMPLETELY ENUMERATED INDIAN RESERVE OR INDIAN SETTLEMENTS. SEE CENSUS DEFINITIONS FOR FURTHER DETAILS.

(2) IN 1971 INCLUDED JAPANESE.

(3) CALCULATED USING THE TOTAL NUMBER OF CHILDREN AT HOME AND THE TOTAL NUMBER OF FAMILIES.

(4) THIS CATEGORY HAS BEEN CREATED FOR 1986 CENSUS DATA TO APPLY TO ALL OCCUPIED PRIVATE DWELLINGS ON RESERVES WHETHER ORIGINALLY REPORTED AS OWNED OR RENTED.

(5) FOR 1971, 1976 AND 1981 "APARTMENTS" INCLUDES ALL APARTMENTS (LESS THAN 5 STOREYS AND MORE THAN 5 STOREYS): IN 1981, APARTMENTS OF ONLY 5 OR MORE STOREYS IS PRESENTED.

(6) INCLUDES MOBILE HOMES AND OTHER MOBILE DWELLINGS SUCH AS HOUSEBOATS AND RAILROAD CARS.

(7) INCLUDES SEMI-DETACHED HOUSES, ROW-HOUSES, OTHER SINGLE ATTACHED HOUSES, APARTMENTS OR FLATS IN A DETACHED DUPLEX AND APARTMENTS IN A BUILDING THAT HAS LESS THAN 5 STOREYS.

CENSUS DEFINITIONS AND SPECIAL NOTES

The Census of Canada collects data on a variety of demographic and socio-economic characteristics of Canadians and the information is recorded on two data bases: the 100% sample database which contains data gathered from all households; and the 20% sample data base which holds data collected from only one-fifth of all households. In 1981 and 1986, the one-in-five ratio applied, while in 1971 and 1976 a one-in-three ratio was used.

The 100% sample data base supplies fundamental demographic information such as age, sex and marital status, as well as family, dwelling, household and mother tongue data. The Alberta Profile presented in this publication is an extract from this data base.

The 20% sample data base generates more detailed demographic and socio-economic data including ethno-cultural characteristics, labour force activity, education, income status and mobility.

As new data becomes available, future editions of the Review will include additional tables incorporating both 100% and 20% sample variables for Alberta and selected geographical areas such as census divisions and municipalities.

CENSUS FAMILY

Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in most census family tables.

MARITAL STATUS

Refers to the conjugal status of a person:

1. (Now) Married (excluding separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now Married".

2. Separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

3. Divorced

Persons who have obtained a legal divorce and who have not remarried.

4. Widowed

Persons who have lost their spouse through death and who have not remarried.

5. Never Married (single)

Persons who have never married and persons whose marriage was annulled.

MEDIAN AGE

An age "X" where exactly one half of the population is older than "X" and the other half is younger than "X".

MOTHER TONGUE

Refers to the first language learned in childhood and still understood by the individual.

OCCUPIED PRIVATE DWELLING

Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents were temporarily absent on Census Day (June 3 in 1986). Types of private dwellings are:

1. Single Detached
A single dwelling not attached to any other building and surrounded on all sides by open space.
2. Single Attached
a single dwelling attached at ground level to another building (such as a store) but separated from it by a common wall running from ground to roof; also includes semi-detached or double houses and row houses.
3. Apartment
A dwelling unit in a high-rise building which has 5 or more storeys or a dwelling unit attached to other dwelling units, commercial units, or other non-residential space in a building that has less than 5 storeys.
4. Duplex
Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.
5. Movable
Includes mobile homes, tents, recreational vehicles, motor homes, railroad cars and houseboats.
6. Mobile Home
A single dwelling, designed and constructed to be transported on its own chassis, and capable of being moved on short notice.

Special Notes: In 1971 and 1976, type of dwelling was reported for occupied private and vacant (unoccupied) dwellings.

In 1986, type of dwelling was coded by Census Representatives in the field. The coverage is occupied private dwellings, unoccupied private dwellings, and dwellings occupied solely by foreign and/or temporary residents. However, unless otherwise specified, all housing data for occupied private dwellings DO NOT include unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

Please note that the dwelling categories have been revised from Census to Census and comparisons with previous censuses should be approached with caution. Due to response bias in classifying certain structural types in the 1981 Census, the data for single attached (semi-detached or double, row house, house attached to a non-residential building), apartment less than 5 storeys, and duplex should be used as one aggregate type, namely, Other Multiple Dwellings.

PRIVATE HOUSEHOLD

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

RURAL (POPULATION)

Refers to persons living outside urban areas.

TENURE

Refers to whether some member of the household owns or rents the dwelling. A dwelling is classified as owned even if it is not fully paid for (eg., with a mortgage). The dwelling may be situated on rented or leased land or be part of a condominium. A dwelling is classified as rented even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative.

URBAN (POPULATION)

Refers to persons living in a continuously built-in area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre, based on the previous census.

Note: In the 1976 Census, the population density criterion was 1,000 persons per square mile (386 per square kilometre). For the 1971 Census, urban areas included:

1. all incorporated cities, towns and villages with a population of 1,000 or over
2. all unincorporated places of 1,000 population or over having a population density of at least 1,000 persons per square mile
3. the urbanized fringe of 1) and 2) where a minimum population of 1,000 and a density of at least 1,000 persons per square mile existed.

SPECIAL NOTES

Incompletely Enumerated Indian Reserves and Indian Settlements

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and ARE NOT included in tabulations. Data for geographic areas containing one or more of these reserves or settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (eg., percentage change) between 1981 and 1986 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

Alberta's population estimate for incompletely enumerated Indian reserves and Indian settlements is 9,453, bringing the final population count for Alberta to 2,375,278.

All Census data is subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with an identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosure without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total.

GLOSSARY

GLOSSARY

ASIST

ASIST (Alberta Statistical Information System) is a publicly accessible on-line information system for the retrieval, manipulation and dissemination of socio-economic data. ASIST has been developed in response to an ever-increasing need for a single source of timely and reliable information, which is readily accessible to businesses, government departments and agencies and the general public.

ASIST contains current and historical statistical information on a wide range of subjects including population, energy, trade and commerce, prices, manufacturing, finance and construction. In general, this statistical information focuses on Alberta and its various geographical areas. The Alberta Bureau of Statistics is solely responsible for co-ordinating the entry, maintenance and updating of all data within ASIST. Where applicable, ASIST matrix numbers have been provided at the bottom of tables. As well, many of the other statistical series presented in this publication are available on the Cansim Mini-base and can be retrieved through ASIST.

AVERAGE WEEKLY EARNINGS

Average weekly earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc. This includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentives, cost of living and other bonuses, payments to persons absent with pay in the survey reference week and overtime earnings (all pay received for the number of hours worked in excess of the standard workday or workweek). The payroll concept does not include supplementary labour costs.

All employees include salaried employees, employees paid by the hour and those employees whose basic remuneration is in the form of commission, piece rates, mileage allowances, etc.

Effective Apr-83, amendments were made to the survey used in collecting this data. Major alterations include:

1. The inclusion of firms of all sizes rather than only those with 20 or more employees.
2. The Industrial Composite concept has been expanded. The new Industrial Aggregate is now the sum of all industries with the exception of agriculture, fishing and trapping, religious organizations, private households and military personnel. (The old Industrial Composite excluded the same as well as education, health and welfare services and public administration.)

BANK RATE

The Bank Rate is the minimum rate at which the Bank of Canada makes short-term advances to the chartered banks or to savings banks governed by the Quebec Savings Bank Act and after 1-Dec-80, to all members of the Canadian Payments Association. Data shown are for the last Wednesday in the reference month.

BUILDING PERMITS

Residential Building Permits - Number of Dwelling Units Created

1. Single
Refers to structures containing only one dwelling unit completely separated from any other dwelling or structure.
2. Cottages
Refers to seasonal dwellings such as summer homes and house-boats.
3. Double
Refers to dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.
4. Row
Refers to one-family dwellings in a structure of three or more attached dwellings.
5. Apartments
Refers to all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats which are part of a non-residential structure are also included.
6. Conversions
Refers to dwelling units added by conversion of existing structures.

Residential Building Permits - Value

Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

Non-Residential Building Permits

Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

1. Industrial Building Permits

Includes buildings used for manufacturing and processing; transportation, communication and other utilities; agriculture; forestry; and mine and mine mill buildings.

2. Commercial Building Permits

Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial - signs, posters, heating and plumbing installations, etc.

3. Institutional and Government Building Permits

Includes expenditures made by the community, public and government for buildings and structures - schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, etc.

CANSIM

CANSIM is the name given to Statistics Canada's computerized data base. It is often termed a general purpose data bank offering a detailed and conceptually compatible set of aggregate data pertaining to a large number of interrelated fields. CANSIM contains over 60,000 timeseries of socio-economic information. An example of a timeseries would be monthly retail sales for Alberta.

The Alberta Bureau of Statistics maintains approximately 6000 timeseries on CANSIM of Alberta specific data at both the provincial and sub-provincial level.

The majority of information contained in this publication is available on CANSIM. For your convenience we have provided CANSIM matrix numbers at the bottom of most tables.

CENSUS DIVISION (CD)

According to 1981 Census boundaries, Alberta is divided into fifteen census divisions. However, as a result of 1986 Census boundary changes, total divisions have increased to nineteen. (CD 8 split into CD's 8 and 9; CD 12 split into CD's 12 and 16; and CD 15 split into CD's 17, 18 and 19.) (See 1986 Census map at front of publication.)

CENSUS METROPOLITAN AREA (CMA)

A CMA refers to the main labour market area of an urbanized core of at least 100,000 population, based on the previous census. The urbanized core, together with adjacent urban and rural areas, have a high degree of economic and social integration. CMA's are comprised of one or more Census Subdivisions (CSD's) which meet at least one of the following criteria:

1. the CSD falls completely or partly inside the urbanized core;
2. at least 50% of the employed labour force living in the CSD works in the urbanized core; or
3. at least 25% of the employed labour force working in the CSD lives in the urbanized core.

Two CMA's are located in Alberta: Edmonton and Calgary.

In the 1981 Census, the Edmonton CMA included Bon Accord, Edmonton City, Fort Saskatchewan, Gibbons, Legal, Morinville, Redwater, St. Albert, Strathcona County No. 20 and Sturgeon Municipal District No. 90. In the 1986 Census, boundary changes were made resulting in the expansion of the CMA to include Leduc County No. 25 and Parkland County No. 31 with their respective component CSD's.

The Calgary CMA consisted of only Calgary City in 1981. In 1986, the CMA boundary increased to include Rocky View Municipal District No. 44 and its component CSD's, ie. Airdrie, Beiseker, Cochrane, Crossfield and Irricana.

CONSUMER PRICE INDEX

The Consumer Price Index (CPI) is a price index which measures the percentage change through time, of a constant quantity and quality of goods and services purchased by a representative Canadian urban family in a specified time period. The CPI for each city measures price changes from one time period to another within that specific city. Thus, while city CPI's show the movement of prices in each city, they do not indicate price level differences between cities, or between cities and Canada. The CPI is not a measure of true inflationary-deflationary trends. The inference of using the CPI as a measure of true inflation or deflation is incorrect. The CPI only measures percentage changes of a "basket" of commodities - not all items which contribute to inflation or deflation are included.

The CPI is compiled using updated weights obtained from the 1982 Family Expenditure Survey which outlines patterns of urban consumer spending behavior.

The CPI Percent Change is calculated by first subtracting the current period index from the previous period index and then dividing this index point difference by the previous period index and finally multiplying the result by one hundred.

DEPLANED

Traffic (passengers, mail and cargo) which lands and disembarks at an airport.

DWELLING COMPLETION

Dwelling completion is the stage at which all the proposed construction work on a dwelling unit has been performed.

DWELLING START

A dwelling start is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

DWELLING UNITS

Please note, the following definitions are applicable only to data from the Survey of Starts and Completions.

1. Single Detached

This is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

2. Semi-Detached

This category includes each one of two dwellings separated by a common wall extending from ground to roof, or by a garage.

3. Row

This comprises only single attached houses in a row of three or more dwellings. Row-duplexes are not included in this category.

4. Apartment and Other

This category includes dwelling units such as:

- duplexes
- double duplexes
- triplexes
- row-duplexes
- apartments as commonly known
- dwellings over, or at the back of, a store or other non-residential structure.

EMPLOYED

The employed labour force includes all persons who during the reference week:

1. did any work at all
2. had a job but were not at work due to:
 - own illness or disability
 - personal or family responsibilities
 - bad weather
 - labour dispute
 - vacation
 - other reason not specified above.

EMPLOYMENT/POPULATION RATIO

The employment/population ratio represents the number of persons employed expressed as a percentage of the population 15 years of age and over. The employment/population ratio for a particular group (age, sex, marital status, etc.) is the number employed in that group expressed as a percentage of the population for that group.

ENPLANED

Traffic (passengers, mail and cargo) which embarks and takes off from an airport.

EXTERNAL TRADE

External trade statistics are compiled from administrative documents collected by Revenue Canada, Customs and Excise. Trade statistics for electricity and exports of crude petroleum and natural gas are collected by the Manufacturing and Primary Industries Division of Statistics Canada. Exports and imports are recorded at values which reflect the actual selling price. Non-trade transactions such as private donations and gifts, settlers' effects and tourist purchases are excluded in the trade statistics.

Domestic Exports - include goods grown, extracted or manufactured in Alberta (including goods of foreign origin which have been materially transformed in Alberta). Prior to 1984, provincial export data was based upon province of lading, indicating where the goods were first laden aboard a carrier for export. Commencing with 1984 data, provincial export statistics are reported on a province of origin basis, that is, the province in which the good were grown, extracted or manufactured.

Imports - import data by province of clearance indicates the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse. This may not always coincide with the province in which the goods are consumed or enter the productive process.

FARM CASH RECEIPTS

Farm cash receipts include the cash returns from the sale of all agricultural products except those associated with direct inter-farm intraprovincial transfers. Other components included are Wheat Board payments, cash advances on farm-stored crops, deferred grain receipts in Western Canada, Agriculture Stabilization Act deficiency payments, Western Grain Stabilization Act payments, and provincial income stabilization payments.

FARM DEBT OUTSTANDING

Farm debt is estimated using a calendar year-end debt outstanding figure. For institutions operating on a fiscal year ending 31-Mar, the debt outstanding at the fiscal year-end, 31-Mar, is used to represent the debt at 31-Dec of the previous year. Excluded from these figures are loans to farmers for non-farm business purposes and for personal use (household purposes). In the case of loans for automobiles, an arbitrary one half of the value of debt outstanding was included as a farm loan. Also excluded were amounts outstanding due to late payment of property tax and income tax.

FARM OPERATING EXPENSES AND DEPRECIATION CHARGES

These estimates include farm business costs incurred by farmers regardless of whether they are paid for in cash or accumulated as new debt. As far as possible, they exclude outlays for goods and services obtained directly from other farmers. All direct subsidy payments are taken into account in order that the estimates represent only net amounts paid by farmers.

Depreciation charges are intended to approximate the replacement cost of the value of farm buildings and machinery used up in the year. Building depreciation estimates are for depreciation on farm buildings including the farm business share of houses on owner-occupied farms. Depreciation is calculated using a straight line rate of 35 percent and an expected building life of 28.5 years.

GROSS DOMESTIC PRODUCT AT FACTOR COST

Gross Domestic Product (GDP) at Factor Cost is a measure of income accruing to the factors of production (land, labour and capital). It does not include income that accrues to the non-factor or invisible components of GDP (see Gross Domestic Product at Market Prices). Thus GDP at Factor Cost is derived from GDP at Market Prices by subtracting Indirect Taxes less Subsidies, plus Residual.

GROSS DOMESTIC PRODUCT AT MARKET PRICES

Gross Domestic Product (GDP) at Market Prices refers to the total value of production within a given geographical area for a specific time period, and is measured in prices which prevail during the period being valued. Total production measures are based upon the earnings of the factors of production (Factor Cost) plus the non-factor costs of production (Indirect Taxes less Subsidies). GDP at Market Prices also includes an indirect measure of depreciation called Capital Consumption Allowances. Since this is a measure of production, it does not include transfer payments.

GROSS DOMESTIC PRODUCT IN CONSTANT DOLLARS

Gross Domestic Product (GDP) in Constant Dollars is a measure of total production during a given time frame and a given geographical location which is valued in prices for some base year. For Alberta, the base year used is 1971.

LABOUR FORCE

The labour force is composed of that portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were employed or unemployed.

LABOUR INCOME

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

MIGRATION

Migration is defined as a permanent change of residence from one geographical unit to another.

NET MIGRATION

Net migration is the difference between in-migration and out-migration for a geographical unit.

NEW HOUSING PRICE INDEX

The new housing price index measures changes in selling prices of new houses constructed by large and medium volume builders in metropolitan areas. The houses sampled are representative of the total being sold at that time but adjustments are made for changes in physical characteristics to arrive at pure price change. Prices used are the selling prices agreed upon between builder and buyer at the time of signing the contract. Prices relate to mid-month. The composite index includes the house and the serviced lot on which it stands.

NEWLY COMPLETED UNOCCUPIED DWELLINGS

Newly completed unoccupied dwellings are those which are not sold or rented at the time the dwellings are reported as completed in the Survey of Starts and Completions. The units are surveyed every month until they are sold or rented.

NOT IN THE LABOUR FORCE

Persons Not in the Labour Force are that portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were neither employed nor unemployed.

PARTICIPATION RATE

The participation rate represents the labour force as a percentage of the population fifteen years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force in that group expressed as a percentage of the population for that group.

PERSONAL DISPOSABLE INCOME

Personal Disposable Income consists of total personal income less personal direct taxes and other current transfers to government from persons.

PERSONAL INCOME

Personal Income includes all forms of income received by persons and unincorporated businesses:

1. wages, salaries and supplementary labour income
2. military pay and allowances
3. net income of non-farm businesses including rent
4. net income of farm operators from farm production
5. interest, dividends and miscellaneous investment income
6. transfer payment income from the government, from corporations and from non-residents.

POPULATION PROJECTION SERIES

Two series of long-term Alberta population projections were prepared by the Alberta Bureau of Statistics for the years 1986-2011. Each series is based on different net migration assumptions:

Series I - Low Growth Net Migration

Series II - Medium to High Growth Net Migration

A lower fertility scenario is used in both series starting at a level of 1.85 per 1,000 women in 1986 and declining to 1.6 per 1,000 women in 2011.

PRIME RATE

The Chartered Banks' Rate on Prime Business Loans is the rate charged to the most credit-worthy borrowers. The rate shown is of the last Wednesday of the month. When there are differences in the rate charged by individual banks, the most typical rate or rates are taken.

PRIVATE AND PUBLIC INVESTMENT

Private and Public Investment consists of total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. Capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Repair expenditures represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets.

RETAIL TRADE

Retail trade is defined as the aggregate sales made through retail locations (outlets). Retail trade estimates do not include any form of direct selling which bypasses the retail store, for example: direct door to door selling; sales made through automatic vending machines; sales of newspapers or magazines sold directly by printers or publishers; and sales made by book and record clubs. Retail trade excludes: retail sales through ancillary units, for example, warehouses, head offices, etc.; sales of contractors whose major activity is not retailing; and retail transactions between individuals.

SEASONAL ADJUSTMENT

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods, grain receipts in Western Canada, deficiency payments made by provincial governments and the agricultural stabilization board and provincial income stabilization payments.

TAXATION STATISTICS

Taxation Statistics are based on individuals that have filed tax returns with Revenue Canada, Taxation. Allocation of income is on the basis of the taxfiler's address at the time of filing. These figures should not be used to arrive at a per capita personal income figure for the province or sub-provincial areas for the following reasons:

1. Some individuals (e.g. students) who have earned small amounts of income during a year may not file a return with Revenue Canada, Taxation.
2. Some taxfilers may not report all income received, i.e., understate their income.
3. Imputed income is not included in taxation statistics, e.g. free room and board, clothing, etc. provided to employees.

TYPICAL MORTGAGE RATE

The typical mortgage rate is the rate charged by chartered banks on either 1 year or 5 year residential mortgages. Monthly data refer to the last Wednesday of the month.

UNEMPLOYED

The unemployed includes those persons who during the reference week:

1. were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work.
2. had not actively looked for work in the past four weeks but had been on layoff for twenty-six weeks or less and were available for work.
3. had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

UNEMPLOYMENT RATE

The unemployment rate represents the number of unemployed persons as a percent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a percent of the labour force for that group.

VALUE OF CONSTRUCTION WORK PURCHASED

The Value of Construction Work Purchased consists of the total value of output of both the construction industry and construction labour forces in other industries. Also included are related construction costs which are accumulated during the creation of a structure. Examples include pre-construction planning and design, management, legal and real estate fees, interest during construction, etc.

VALUE OF FARM CAPITAL

Land and Buildings - value of land and buildings is an estimate of the value of real estate used for agricultural purposes or the value of real estate used for agricultural production located on one acre or more and with gross sales greater than \$250.

Implements and Machinery - value reported at its market value, which is the value the machinery would have in its present condition in an auction sale.

VALUE OF MANUFACTURING SHIPMENTS

Value of manufacturing shipments is defined as the gross value of goods produced from its own materials by the reporting establishment, or for its account. Value is net of discounts, returns and allowances, sales tax, excise taxes and duties, returnable containers and common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Shipment values in this publication are monthly projections of annual census of manufacturers' values based on returns from a stratified systematic sample of manufacturing establishments.

WELL COMPLETIONS

Wells completed (also referred to as initial zone completions) include the number of new producing oil and gas formations recorded by Alberta Energy Resources Conservation Board during a reference month.

WELLS DRILLED - Type Of

Development - developmental drilling takes place within a proved or established area of an oil reservoir to a depth known to be productive.

Exploration - exploratory drilling refers to locating oil fields or pools, or testing for new fields or pools, in areas that have not been designated as producing areas.
